

CLAIMS

What is claimed to be new and desired to be protected by Letters Patent is set forth in the appended claims.

I claim:

1. A training aid for a golfer for attachment to the brim of a hat or sun visor being worn on the head of the golfer, comprising:
 - a) a housing for containing the training aid;
 - b) a light source being disposed internal said housing, wherein said light source generates a beam of light, wherein said light beam is directed downwardly toward a golf ball which golf ball the golfer is about to hit with a golf club;
 - c) wherein said housing is adapted for attachment to the brim; and,
 - d) an angular adjustment member for adjusting the angle between said housing and the brim to permit the beam of light to be adjusted with respect to the ball.
2. The training aid of Claim 1, further comprising a clip for attaching said housing to the brim to permit the housing to be attached to and removed from the brim.

3. The training aid of Claim 2, wherein said angular adjustment member comprises a hinge.

4. The training aid of Claim 3, further comprising an adjusting knob being disposed on said hinge to adjust the angle of said hinge.

5. The training aid of Claim 4, wherein said light source comprises a collimated light source.

6. The training aid of Claim 5, wherein said collimated light source generates a red light beam.

7. The training aid of Claim 6, further comprising a power source so that said light source can be powered.

8. The training aid of Claim 7, further comprising an on/off switch so that said light source can be controlled.

9. The training aid of Claim 8, wherein said housing is cylindrically shaped having first and second opposing ends, wherein said light source is disposed in said first end of said housing.

10. The training aid of Claim 9, wherein said clip is attached to said housing between said first and second ends of said housing.
